since 1972

Arden®

Strong as a bear with well-balanced proportions
the
Arden Range Rover Sport AR6 Stronger

Elegance, discreet sportiness and understatement have always been the distinguishing features of English cars. For years, Arden has been the place to go for customers who wish for more emphasis on the typical characteristics, as well as a customisation of their Range Rover. Arden also gives the current Range Rover Sport comprehensive modifications. From the aerodynamic-kit to the performance increase and right up to the enhanced interior, with the AR6 Stronger Arden offers an attractive SUV, which is classed "over the top" simply through its performance.

since 1972

Well-balanced proportions

The performance of the AR6 is believable just when it stands in front of you with its bodywork kit manufactured with accustomed Arden quality. The front and rear spoilers fit superbly with the basic design of the Range Rover. They also give the vehicle a massive appearance without losing well-balanced proportions and even the functionality does not abridge the looks.

To achieve better braking system ventilation, Arden furnishes its front spoilers with big air ducts. Arden even incorporates these into the hood, in order to guarantee better cooling for the increased performance of the engine.

since 1972

* These positions can only be installed at the Arden plant in Krefeld, Germany.

** For Export only.

Arden®

Strong sound and an excellent optical characteristic

Arden widens the front and rear wings by approximately 4.5 cm. A side skirt trim serves as an artistic link between the line from the front to rear spoiler and continues over the widened wings. All parts are manufactured from carbon-fibre reinforced composite. The rear spoiler, the (component probably most seen by other road users) features openings to the left and right for the tailpipes of the Arden stainless steel exhaust system. In addition the rear spoiler gleams with its diffuser look.

When it comes to sound, the Arden Range Rover Sport AR6 Stronger abandons its British reserved nature. Arden informs the public about the increased performance of the modified Range with a full sound. The Arden engineers have created an exhaust system with a sport catalytic converter. Besides the much better sound in comparison to the standard system, the high-performance system also has a "big end", or rather four - because two twin tailpipes show observers that even without the motor running something special has been fitted under the Range.

What would tuning be without new wheels? Arden banks on his own 10x22 inch creation. Arden fits 295/30 R22 tyres to the elegant, 10-spoked, light alloy wheels which provides not only a sporty look but also adequate traction. In addition, the "airy" look allows a glimpse of the brakes. Optionally there are 10x23 inch wheels with 315/25 R23 tyres available. (Export only)

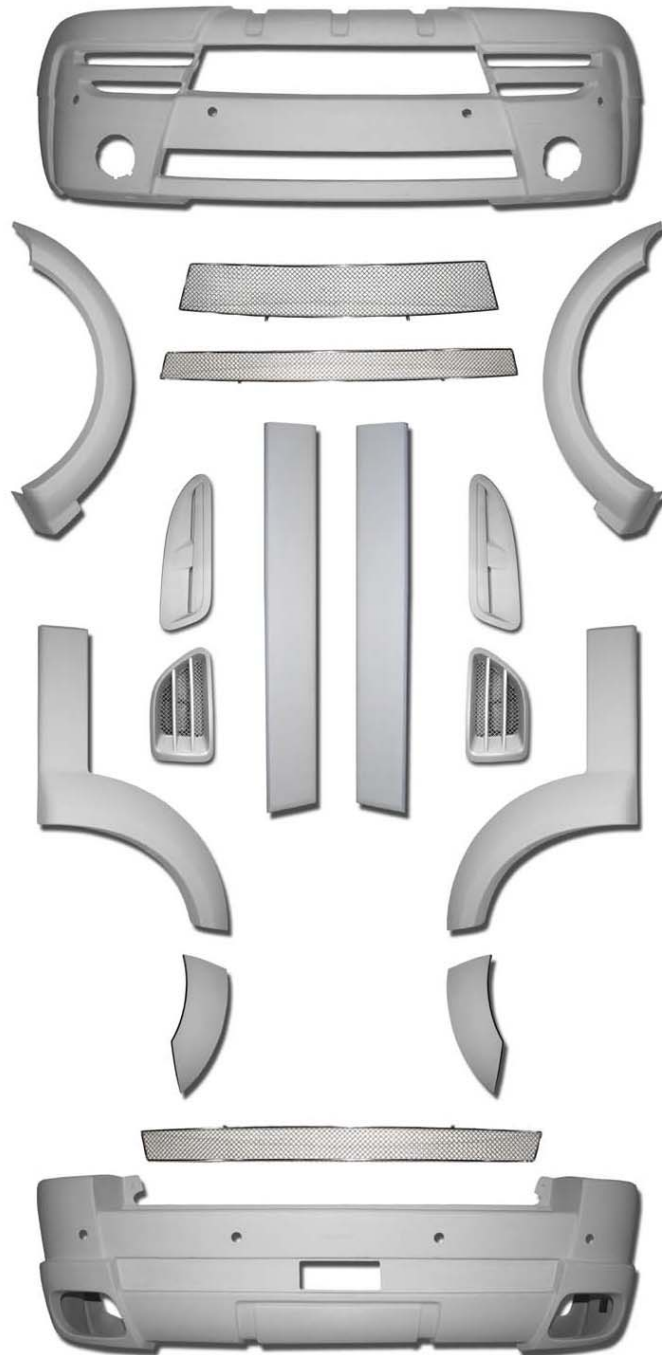

since 1972

Arden AR 6 Stronger Basic-Kit

The Arden Stronger Basic-Kit includes:

- Complete body set
- Arden Sport Silencer System

** For Export only.

since 1972

Arden Engine Performance Increase

Performance and torque are of great importance for fun and dynamic driving. Quality and balance of the engine, longevity and ease of maintenance, was the number 1 driving the development of this combination. When optimising the motor management system for performance increase, the main focus lies in gaining a rich torque characteristic without interfering the engine efficiency. Based on our long development experience with the well-known 4.2 litre Jaguar engine, you will especially profit from the new Range Rover V8 generation engine. Motor electronics, air inlet and fuel systems are carefully matched to the finest point allowing a harmonized development of power in accordance with an excellent quality and balance of the engine.

Power increase for TDV 6 - 2.7

ARK 70211 6 **	Power increase by using an additional ECU	€ 980,00
	Power upgrade about 25 hp and 500 Nm max torque Easy and trouble free installation using original factory connectors.	
ARK 70210 6	Power increase by reprogramming the ECU *	€ 1.250,00
	Power upgrade about 30 hp and 510 Nm max torque Power performance increase gained by reprogramming the ECU by fine adjustment to the respective programme mapping. The programmed speed limiter will be deactivated.	

Power increase for TDV 8 - 3.6

ARK 70212 6 **	Power increase by using an additional ECU	€ 1.400,00
	Power upgrade about 30 hp and 690 Nm max torque Easy and trouble free installation using original factory connectors.	
ARK 70213 6	Power increase by reprogramming the ECU *	€ 1.800,00
	Power upgrade about 35 hp and 700 Nm max. torque Power performance increase gained by reprogramming the ECU by fine adjustment to the respective programme mapping. The programmed speed limiter will be deactivated.

Arden Engine Performance Increase

Power increase for V8 4.2 SC

ARK 70224	3 **	Power increase by using an additional ECU Power upgrade about 25 hp and torque increase of approx. 50 Nm Installation	€ 2.800,00 € 350,00
ARK 70220	3	Arden AR 05 power upgrade * Power upgrade about 40 hp and clear torque increase about 60 Nm through Arden ECU together with the Arden full exhaust system and catalytic converters. This system provides you a fantastic V8 typical sound and a much better throttle response.	€ 6.400,00
ARK 70221	1 **	Arden AR 06 performance increase * Power upgrade about 90 hp, torque increase of ~ 90 Nm With increased engine capacity to 4.5 litre using a special manufactured crankshaft and connecting rods. With improved oil circulation and coo- ling. Improved boost pressure and metal sport catalysts. Deactivating the factory fitted speed limiter.	€ 29.750,00
ARK 70222	1 **	Arden extra control unit For the update of the factory side programmed speed limit Installation <small>(We recommend our end silencer system and power upgrade ARK 70224 or ARK 70220 together with this system)</small>	€ 1.600,00 € 150,00
ARK 70225	3 **	Arden power upgrade about 55 hp * with clear torque increase about 70 Nm through modified supercharger. Together with the high performance exhaust system and sport catalytic con- verters. Separate ECU for an optimized engine management strategy. This system provides a much better throttle response combined with a fantastic V8 sound spectrum. Installation	€ 12.900,00 € 750,00
ARK 70226	1 **	Arden AR 07 power upgrade * Power upgrade up to approx 520 hp and clear torque increase With increased engine capacity to 4.5 litre using a special manufactured crankshaft and connecting rods. With improved oil circulation and cooling. High performance supercharger, high performance exhaust system with sports metallic catalytic converters, adjustment of the engine control unit and deactivating the factory fitted speed limiter.	€ 49.500,00
ARK 70227	1 **	High Performance Supercharger Kit Power upgrade up to approx. 450 hp achieved by increased air boost without increase in engine revs. and therewith greatly improved efficiency as compared to the standard compressor. The kit implies: - High performance twin screw supercharger - Fitting parts from high quality aero aluminium - Adjustment of the engine control unit - Arden High Performance exhaust system with sports metallic catalytic converters	€ 22.500,00

* These positions can only be installed at the Arden plant in Krefeld, Germany.

** For Export only.

Arden high performance breaking system

Arden adapts the brake system to the increased performance. The high-performance system features 6-piston fixed callipers at the front and 4-piston fixed callipers at the rear. They emphatically exert their force on the ventilated, drilled brake discs and ensure sustained deceleration of the British Colossus.

6-piston fixed callipers together with drilled and ventilated 394 mm discs for the front and 4-piston fixed callipers with drilled and ventilated 380 mm discs for the rear guarantee excellent deceleration values plus enormous stability.

AAK 70111 1 Arden High Performance Brake System € 12.500,00

comprises:

- 2 six-piston fixed alloy callipers with
- 2 ventilated and perforated front brake discs (Ø 394 mm)
- 2 four-piston fixed alloy callipers with
- 2 ventilated and perforated rear brake discs (Ø 380 mm)
- Steel flexible brake hose, pads and mounting material

Installation

€ 750,00

AAK 70111K 1 Arden ceramic High Performance Brake System on request

like AAK 70111 1, but with ceramic brake discs
 Advantage over AAK 70111 1: highly reduced weight, more driving comfort, better acceleration and longer lifetime

since 1972

Arden Sidebars - something special

The Arden Sidebars are finished in stainless steel with special laser processed holes. The sidebars can be illuminated and highlight the lower edge of the entry door. It's not only easier for the passengers to enter the car in the dark, but it is also a stunning eye-catcher.

The dynamically formed Arden sidebars end caps will be painted in car color or individually created by customer's choice. (On the picture carbon design)

ARK 70004 4	Arden Sidebar - Set - Finished in stainless steel with special laser processed holes. Harmoniously integrated end caps painted in the car color.	€ 1.450,00
	Painting of end caps and installation	€ 350,00
	Extra charge for end caps with carbon coat, incl. installation	€ 550,00
ARK 70005 3	Sidebar Illumination Optional lighting for ARK 70004 4. Operated by the interior lights with special fitted illuminants for the sidebars.	€ 450,00
	Installation	€ 160,00

* These positions can only be installed at the Arden plant in Krefeld, Germany.

** For Export only.

since 1972

Arden Gullwing Doors - the ultimate individualisation

It's the ultimate and eye-catching trend: Gullwing doors

The Arden gullwing door system consists of a special articulation, which first opens the door to the outside and lifts it safe and dampened to the top afterwards. The opening process is supported by a pneumatic spring, so there is no greater effort needed. The whole mechanism is made of stainless steel and certificated by the significant automotive manufacturer guidelines.

ARK 70013 4	Arden Gullwing Doors Modification with special hinges	€ 16.500,00
-------------	--	-------------

incl. Installation

since 1972

** For Export only!

Aerodynamic and Design Parts are patented or design copyrighted.

High Quality design all around

Arden Interior - Individualism for your Range

Arden enhances the interior with various elements because customers predominantly see their Arden Range Rover Sport from the inside. All interior work is carried out in Arden's own saddlery. Customer requests are manufactured with the highest precision and attention to detail. Every request - no matter how extraordinary - is a welcome challenge. The high-quality realisation of this challenge is Arden's uppermost goal. Leather and Alcantara are custom-tailored in every desired color and various exotic woods are processed. The experienced Arden team also manufactures chrome-, carbon-, aluminum- and piano-paint applications for their customers.

since 1972

Arden Entertainment Systems

The Arden Entertainment System offers Multimedia-Feeling at the highest Level. No matter if it's DVD, digital TV or the integration of a game-console, almost everything is possible, to the point of a complete equipped Business-Car.

The system includes 2 integrated screens in the front seats headrests for individual video-entertainment of the rear seat passengers. For example, one passenger can watch a DVD movie, while another one is using his or her Playstation. The driver and front seat passenger remain undisturbed because the rear seat passengers are using cordless headphones.
